1. Introduction

On January 28, 1999, the Municipal Council of the City of Camden passed Resolution MC-99:48, amended on December 19, 2002 and sealed on February 24, 2003, authorizing the City of Camden Planning Board to conduct an investigation to determine whether the **Parkside Study Area** is in need of redevelopment.

Camden City is the largest of 37 municipalities in Camden County and is located in southeastern New Jersey along the Delaware River, across from Philadelphia, Pennsylvania. The City of Camden authorized the Camden Planning Board to prepare a redevelopment plan for Parkside, located between the Cooper River and the Port Authority Transit Corporation (PATCO) High-Speed line. The Planning Board commissioned Hillier to prepare the determination of need study and subsequent redevelopment plan. This report will provide data necessary for the Planning Board to render a determination as to whether the area does or does not require redevelopment pursuant to the New Jersey State Local Redevelopment Law 40A: 12A-1, et seq.

The *Parkside Neighborhood Market Analysis* (Renwick and Associates, 2000) reveals that this once thriving streetcar suburb has declined and that vacancy and disrepair are becoming increasingly widespread. There is a serious need to conduct a more focused examination of Parkside's redevelopment needs, opportunities, and problems.

This study identifies information relevant to statutory criteria and conditions of the study area. The first section identifies the study area and examines existing land uses, property conditions, and ownership. The second section describes the criteria used in making a determination of need for redevelopment. The third section contains the Study's findings and recommendations to the City of Camden Planning Board, relative to determining the redevelopment needs of the area.

PARKSIDE DETERMINATION OF NEED STUDY

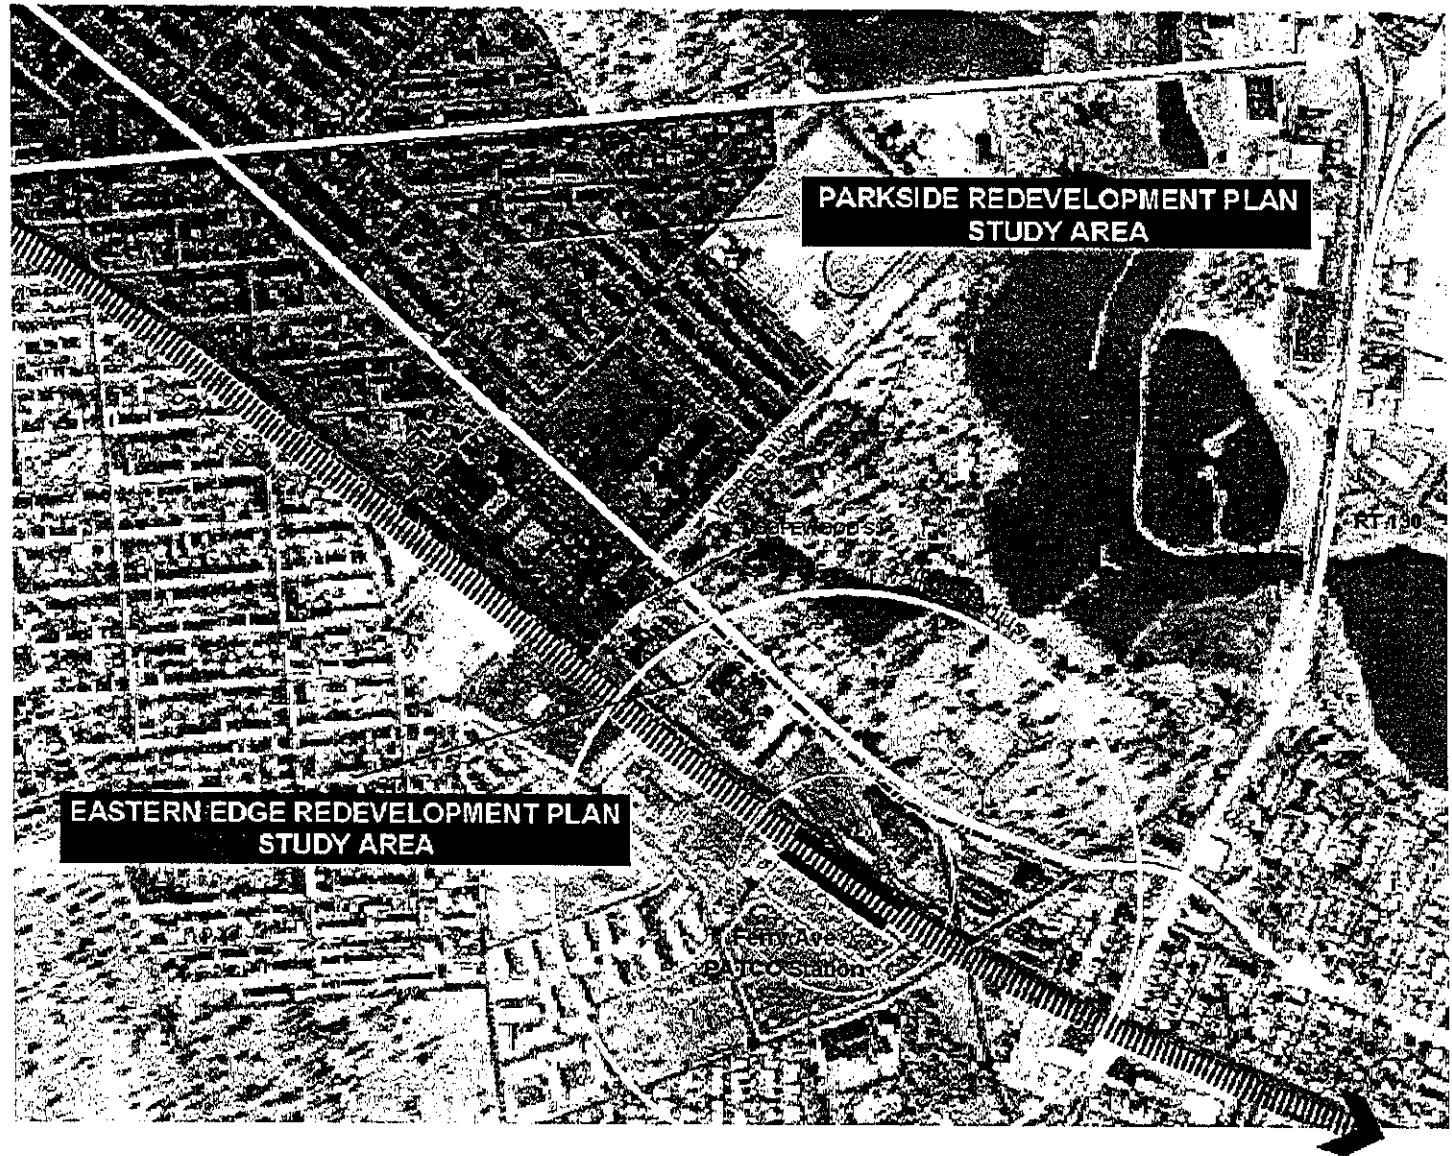

Establishing the Framework

Study Authorization

The Municipal Council of Camden authorized the study of a redevelopment plan for the Parkside Study Area on January 28, 1999 (MC-99:48). This plan will follow the determination of need study, pursuant to NJSA 40A: 12A-1, et seq. Hillier was authorized by the Planning Board to complete this report. HopeWorks GIS in Camden, NJ, completed the inventory/assessment study. Following the redevelopment plan, the Parkside Business and Community in Partnership (PBCIP), a non-profit community development corporation, will commence preparation of a Neighborhood Plan, striving for 10 percent community participation.

The Parkside Study Area as delineated by Municipal Council includes a small area of overlap with the Easter Edge Redevelopment Study Area as indicated in the map on page 6.

Eastern Edge Study Area

Scope of Study

The Determination of Need Study involves several steps:

1. Present inventory of Parkside Study Area's characteristics
2. Propose findings and recommendations relevant to the determination of the need for redevelopment of the study area
3. Show to what extent they meet criteria outlined in State statute
4. Declare study area in need of redevelopment

The New Jersey Redevelopment statute does not require that all property in the study area be in need of redevelopment or rehabilitation. The area may include individual parcels that do not reflect any of the eligibility criteria listed in the statute.

The HopeWorks GIS project team conducted a field investigation of land uses and property conditions within the Parkside Study Area. Zoning and property ownership information were obtained from City and County sources.

Report sections

1. Introduction: Identification of study area and examination of existing land uses, property conditions and ownership
2. Study Area: Description of criteria used in making a determination of need for redevelopment, pursuant to the New Jersey "Local Redevelopment and Housing Law," P.L. 1992, c. 79 (NJSA 40A: 12A-1, et seq.)
3. Determination: Findings and recommendations to the City of Camden Planning Board, relative to determining the redevelopment needs of the area

2. Study Area

Study Area Location

The Parkside Study Area "...includes those parcels of land described and delineated on the official tax map of the City of Camden as those bounded by PATCO Rail Line, Park Avenue, Vesper Avenue and Pine-Walnut to the North." (City of Camden Resolution MC-99: 48, adopted January 28, 1999)

The Study Area for this study covers the area delineated in the above resolution as well as sections of the neighborhoods of Whitman Park and Gateway. Portions of Census Tracts 6002, 6014, and 6015 comprise the study area. The study area generally consists of residential uses that are bisected by Haddon Avenue, a large commercial artery running parallel to the PATCO high-speed rail line.

Land Use

The Parkside Study Area, like the entire neighborhood, is a predominantly residential area. Among its 2843 properties, distributed over 66 street blocks, only 587 (20.6%) are not single family houses or apartments: 95 are storefronts or other forms of commercial property. Industrial uses are not prominent in the Parkside Study area; however, adjacent to the study area, northeast of Park Boulevard is a concentration of industrial properties.

The Delaware River Port Authority parking lot serves the PATCO line, which defines the southern edge of the study area. The PATCO line provides convenient access across the state and into Philadelphia. Although not within the Study boundaries, The Harleigh Cemetery along with the cemetery at the intersection of Mount Vernon and Haddon, which is in the study area, provide green open space, influencing the character of the Study Area. The strong institutional presence, also in this area, contributes to the stability of Parkside and encourages the presence of a business community. Several schools including the adjacent Camden High School, Our Lady of Lourdes Medical Center and Farnham Park, also assist in attracting new investments into the neighborhood.

Several small- to medium-sized retail, office and manufacturing uses own land in the area, function independently of the Medical Center and contribute to the economy of the City. Most businesses in the area are not medically related and not auxiliary to any institutional uses. Forming the business community are a retail liquor store, a restaurant, a retail carpet store, a windows/doors outlet, a forklift company, a syrup manufacturer and a car repair shop, among others. The diversity of uses presented by the active business community adds necessary variety and stability to Parkside.

Property Vacancy

The survey of property uses and conditions indicates that 19.4% of all properties in the Parkside Study Area are vacant. Of these, there are 361 vacant buildings and 191 vacant lots. Most of the vacant buildings are dwellings. Vacant properties, in general, are dispersed throughout the Parkside Study Area. Highest concentrations of abandoned buildings occur in the residential districts surrounding the Park Avenue Haddon Avenue Gateway. Specifically, these pockets exist along Louis Street and in the Princess Avenue Corridor, east of Kaighns Avenue.

The residential fringe bordering the Whitman Park Neighborhood, which is bounded by Haddon, Mt. Ephram, Kaighns, and Ferry Avenues, contains the highest amounts of vacant lots, with over 50% vacancy within most of this area's blocks. Princess Avenue, between Walnut and Pine Streets, also contains huge numbers of vacant lots. Vacant lots collect tires, refuse, and abandoned vehicles and property. They are also increasingly becoming sites for illegal activity such as drug trafficking.

Zoning

The zoning of an area indicates the permitted use of property. Four Zoning Districts exist in the Parkside Study Area:

R-1 (Medium-Density Residential)

The residential district east of properties fronting Haddon Avenue is zoned R-1. This designation permits the development of 29 units per acre of single-family dwellings and apartments. R-1 building heights are limited to 35 feet (3 stories). Lot width, building width, and lot size must be at least 20 ft, 18 ft, and 1500 sq. ft, respectively. A 15-ft front yard setback is required. The deteriorated residential area west of Haddon, between the rear property line of properties facing Haddon Avenue and the PATCO High-Speed line tracks is also zoned Medium-Density Residential.

C-R (Commercial-Residential Mixed-Use)

Properties fronting Haddon Avenue south to Euclid Avenue fall within the Commercial Residential Mixed-Use category. C-R zoning designation permits a wide variety of commercial uses, including general retail and business uses, professional offices, and high-density residential uses at approximately 109 units per acre.

Use prohibitions include:

- wholesale, storage, warehouse facilities;
- junkyards;
- motels/hotels;
- adult entertainment uses;
- amusement centers of any type

There are no area, bulk, height and yard requirements, except for a 30-ft minimum rear yard. Off-street parking is required for new buildings.

I-1 (Light Industrial)

The area east of Haddon Avenue north of the residential district is zoned for industrial uses, including light manufacturing, wholesale and storage, and heavy commercial uses.

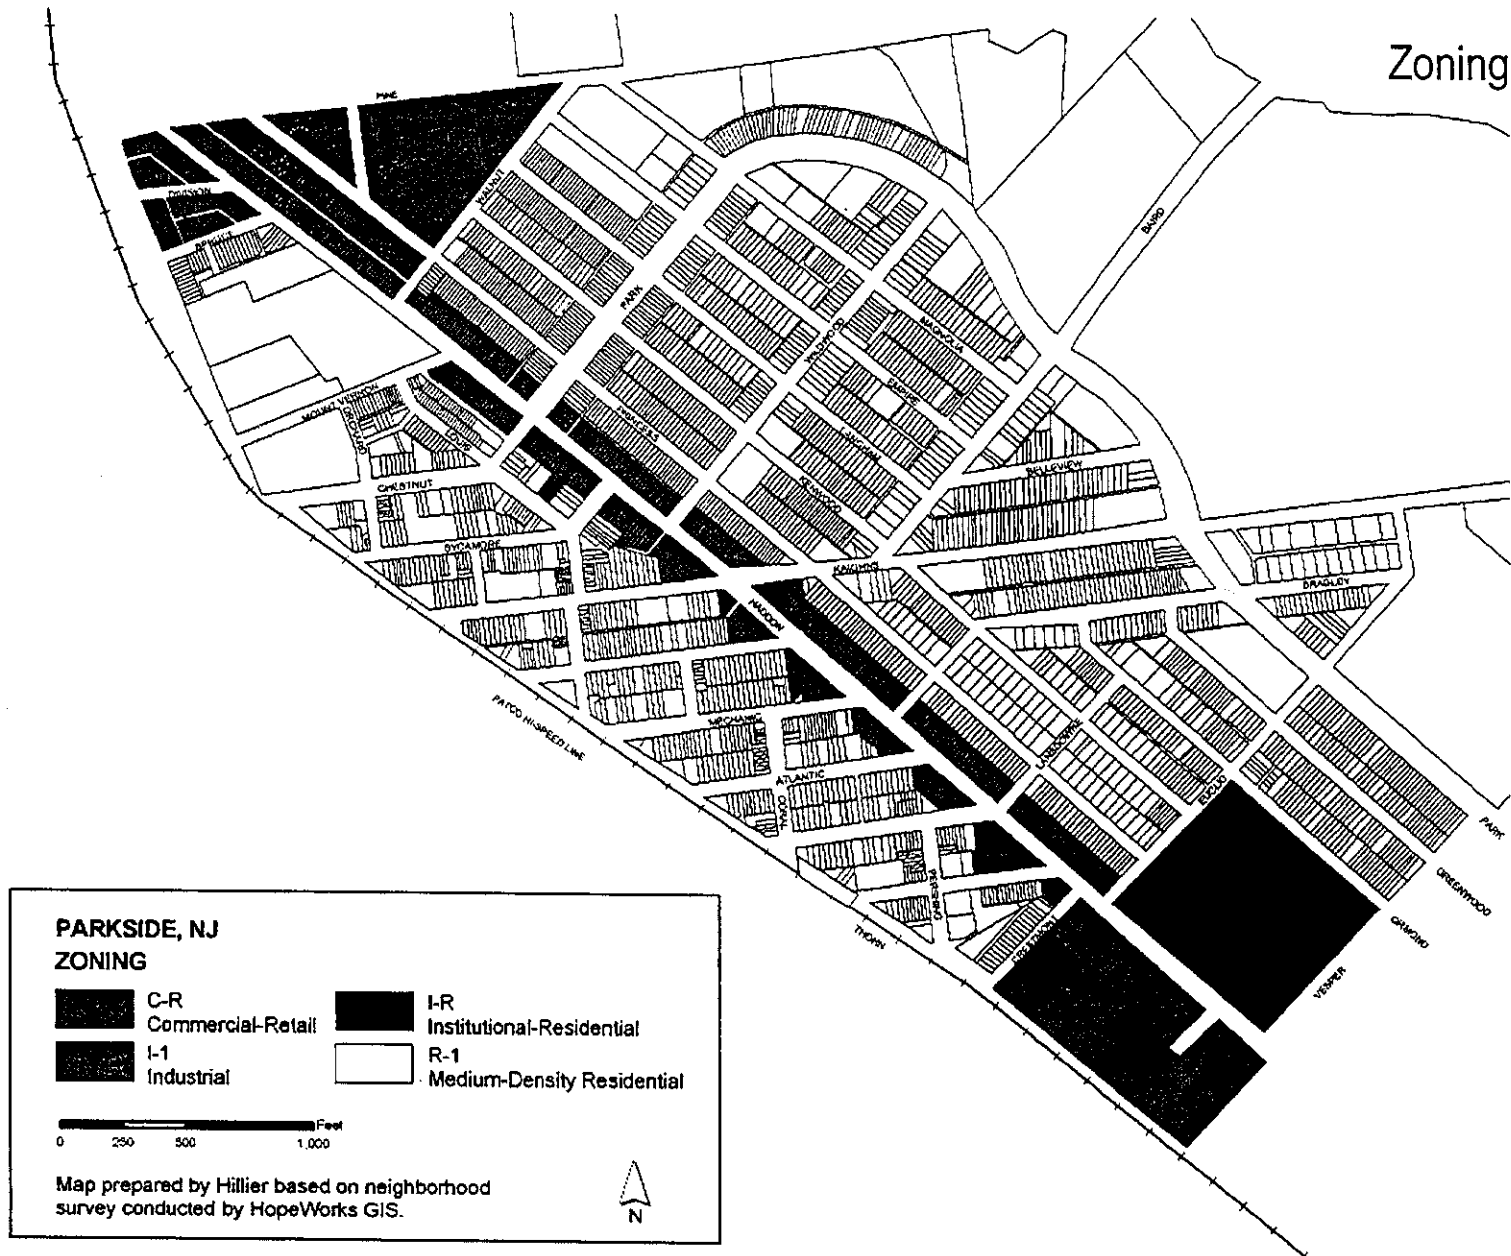

I-R (Institutional-Residential, Mixed-Use)

The Our Lady of Lourdes Medical Center on Haddon Avenue south of Euclid Avenue is situated in the Institutional Residential, Mixed-Use zone. Permitted uses include high-density R-2 residential uses, hospitals and universities, and offices.

Survey Definitions

Documentation of existing conditions and mapping of the redevelopment area was completed by HopeWorksGIS. The sites and structures in the Parkside study area were inspected from the exterior only. The survey was completed using a scoring system. For each negative characteristic present, the parcel was assigned a value of -1 and similarly, for each positive characteristic, assigned a value of +1.

Negative characteristics included:

- Broken/missing window
- Broken/missing door
- Unstable walls
- Chipped paint
- Roof damage
- Porch damage
- Garbage/trash
- Graffiti
- Cracked sidewalk
- Presence of abandoned cars
- Presence of tires
- Presence of appliances

Positive characteristics that received a value of +1 included:

- New paint/siding
- Outdoor lighting
- Evidence of recent rehabilitation
- Presence of lawn decorations
- Presence of flowers

Based on a tally of scores, the following coding system was established to rank the parcels:

- 10 to -4: Poor
- 3 to 0: Fair
- 1 to 4: Good

Property Conditions

The qualitative building conditions survey should be interpreted using the following definitions:

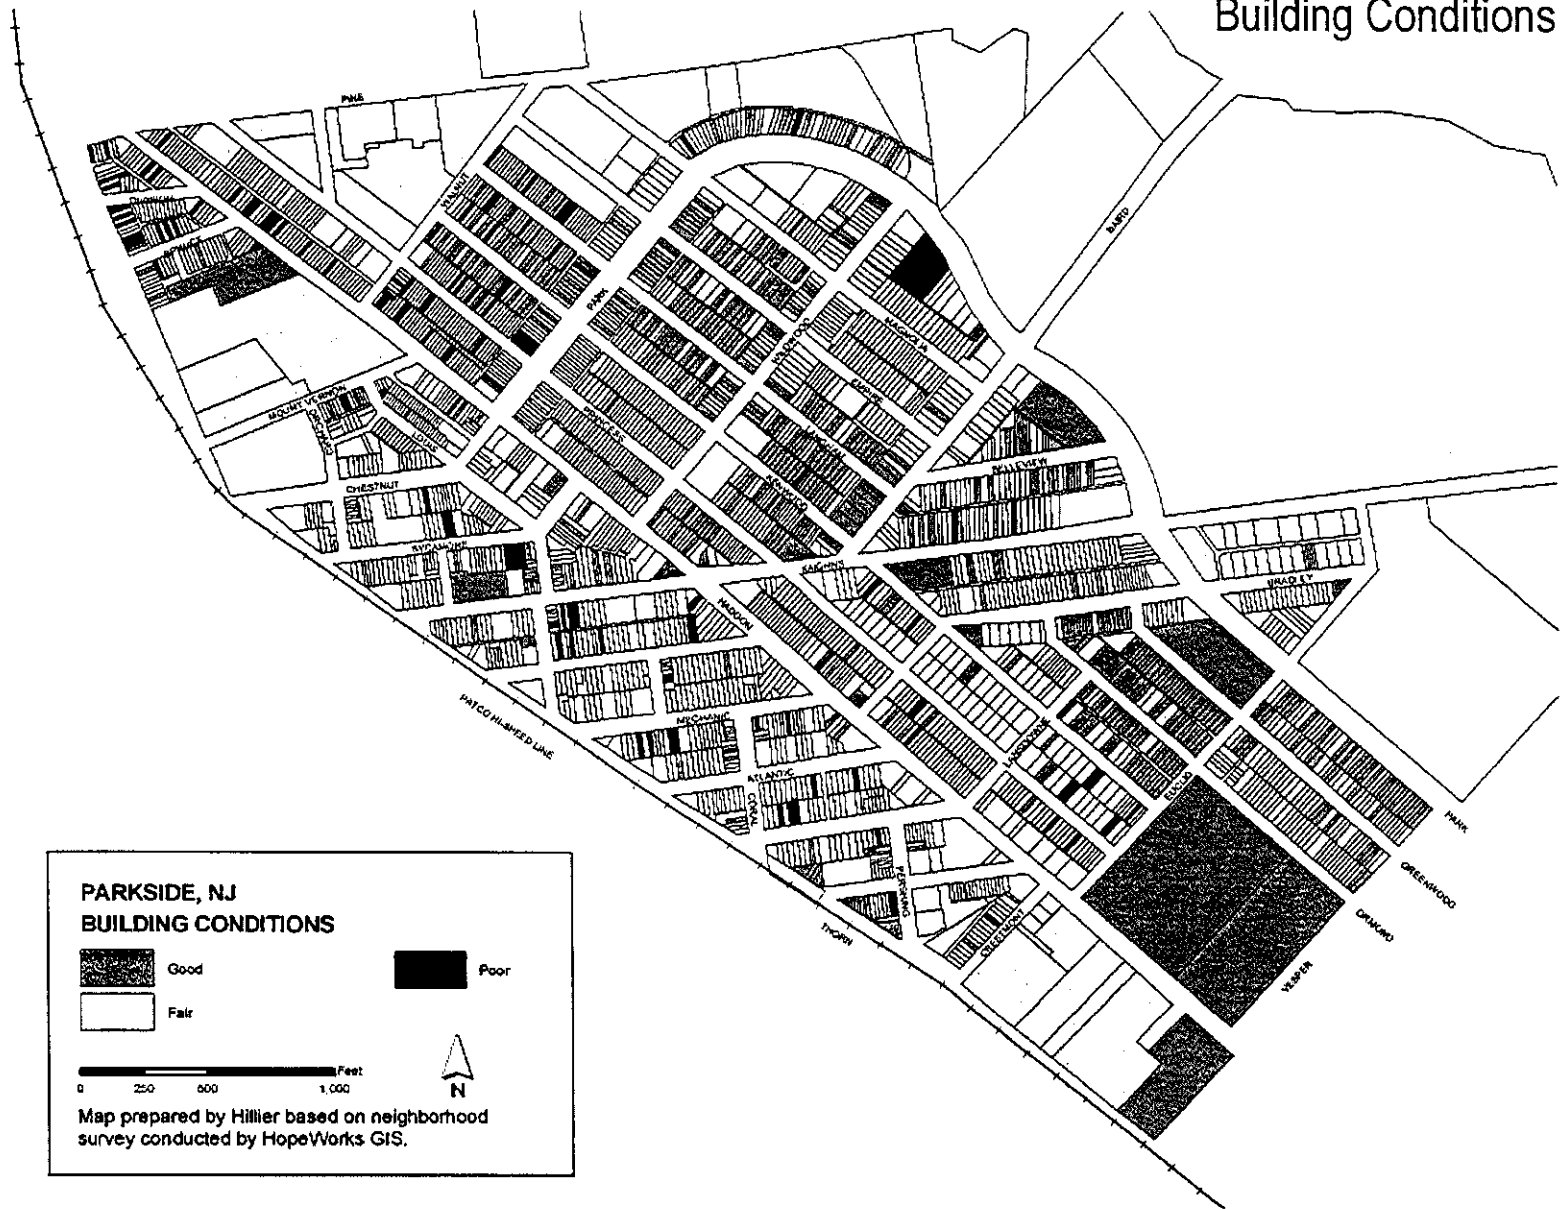

- Good** The building appears to be structurally sound and does not require repair.
- Fair** Building(s) require maintenance or repairs that are cosmetic in nature, e.g., paint, broken windows, clean up, etc. Vacant buildings (which generally need more repairs, in addition to missing windows, doors and utilities), still appear to be structurally sound.
- Poor** These buildings are clearly substandard or deteriorated. They require repairs, construction or replacement at considerable effort. If occupied, structures must be rehabilitated at significant expense. Other properties in this category include vacant, boarded up and vandalized buildings.

Of the 2843 parcels in the Parkside Study Area, 76.6% are in fair condition. 6.7% are in substandard or deteriorated condition. Most of the poorest building conditions and masses of fair conditioned properties can be found among areas with high vacancies, generally in the residential fringe adjacent to the Whitman Park Neighborhood and in the Princess Avenue Corridor.

Property Ownership

Most property (91.5%) is privately owned. The City of Camden owns 133 properties. The Camden Board of Education owns the Hatch Middle School and the Parkside School. Ownership by other non-profit organizations such as PBCIP includes the Boys and Girls Club of Camden County, Our Lady of Lourdes Hospital, and the First Refuge Baptist Church.

Closer examination of the property ownership information reveals that over half of the properties in the Study Area are owner-occupied. Some non-resident owners (those who list their tax/mailing address as different from the property they own) reside elsewhere in Camden and while others live in Pennsauken, Cherry Hill, and Maple Shade. The remainder include addresses in Pennsylvania, New York, Maryland, Virginia, South Carolina, Florida, Arizona, and California, among other states.

The following table summarizes the distribution of property ownership in the Parkside Study Area:

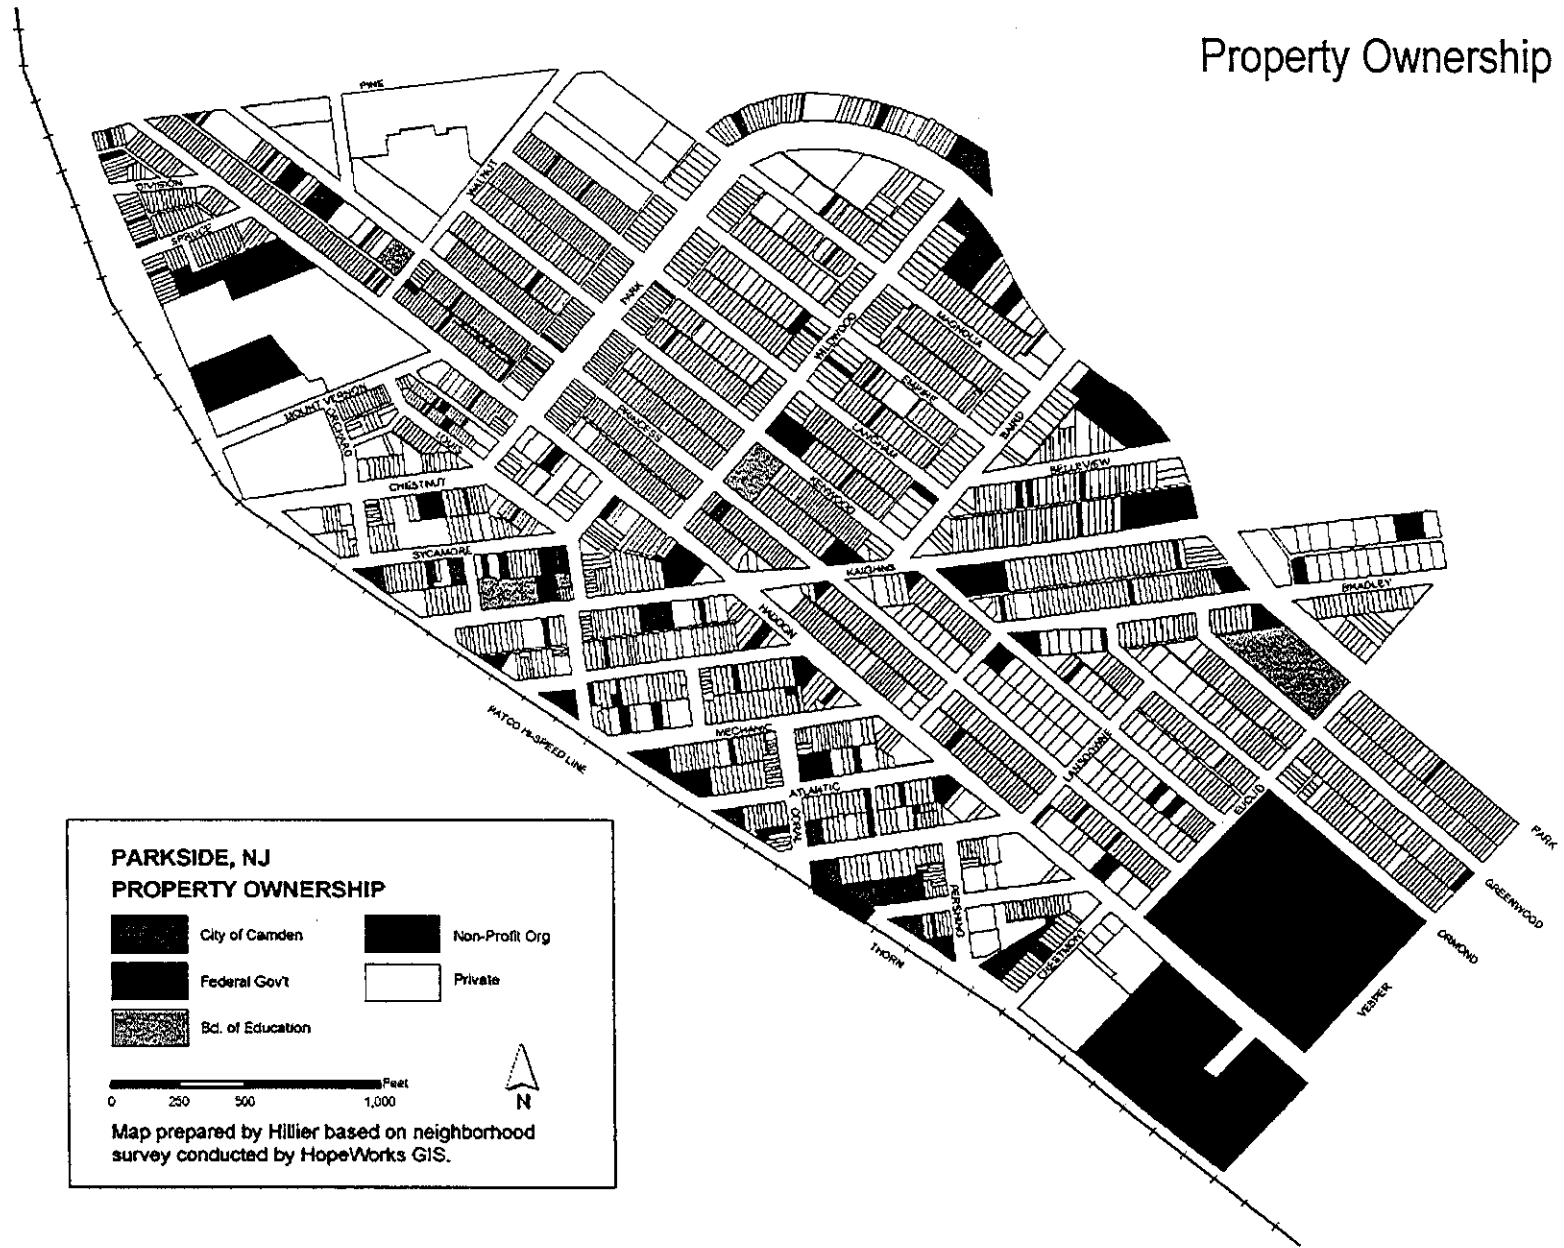

OWNERSHIP	# OF PARCELS	
Private	2599	91.5%
City of Camden	133	4.7%
Non-Profit Organization	95	3.3%
Federal Government	9	0.3%
Board of Education	7	0.2%

2.8 Statutory Criteria

Local Redevelopment and Housing Law (NJSA 40A: 12A)

The purpose of the New Jersey Local Redevelopment and Housing Law (LRHL) is to promote the physical development and improvement of "...conditions of deterioration in housing, commercial, and industrial installations, public services and facilities and other physical components and supports of community life, ...which ...without this public effort are not likely to be corrected or ameliorated by private effort." LRHL empowers local governments in their efforts to reverse these conditions and promote the advancement of community interests through programs of redevelopment, rehabilitation, and incentives to expand and improve commercial, industrial, residential, and civic facilities.

In order to declare an area in need of redevelopment, the governing body of the municipality must conclude, after investigation and public hearing, that within the delineated area at least one of the following conditions set out in this statute must exist (NJSA: 40A: 12A, emphasis added):

- a. The generality of buildings are substandard, unsafe, unsanitary, dilapidated, or obsolescent, or possess any of such characteristics, or are so lacking in light, air, or space, as to be conducive to unwholesome living or working conditions.
- b. The discontinuance of the use of buildings previously used for commercial, manufacturing, or industrial purposes; the abandonment of such buildings; or the same being allowed to fall into so great a state of disrepair as to be untenable.
- c. Land that is owned by the municipality, the county, a local housing authority, redevelopment agency or redevelopment entity, or unimproved vacant land that has remained so for a period of ten years prior to adoption of the resolution, and that by reason of its location, remoteness, lack of means of access to developed sections or portions of the municipality, or topography, or nature of the soil, is not likely to be developed through the instrumentality of private capital.
- d. Areas with buildings or improvements which, by reason of dilapidation, obsolescence, overcrowding, faulty arrangement or design, lack of ventilation, light and sanitary facilities, excessive land coverage, deleterious land use or obsolete layout, or any combination of these or other factors, are detrimental to the safety, health, morals, or welfare of the community.

PARKSIDE DETERMINATION OF NEED STUDY

Establishing the Framework

- e. A growing lack or total lack of proper utilization of areas caused by the condition of the title, diverse ownership of the real property therein or other conditions, resulting in a stagnant or not fully productive condition of land potentially useful and valuable for contributing to and serving the public health, safety and welfare.
- f. Areas, in excess of five contiguous acres, whereon buildings or improvements have been destroyed, consumed by fire, demolished or altered by the action of storm, fire, cyclone, tornado, earthquake or other casualty in such a way that the aggregate assessed value of the area has been materially depreciated.
- g. Area in any municipality in which an enterprise zone has been designated pursuant to the "New Jersey Urban Enterprise Zones Act," P.L.1983, c.303 (C.52:27H-60 et seq.) the execution of the actions prescribed in that act for the adoption by the municipality and approval by the New Jersey Urban Enterprise Zone Authority of the zone development plan for the area of the enterprise zone shall be considered sufficient for the determination that the area is in need of redevelopment pursuant to sections 5 and 6 of P.L.1992, c.79 (C.40A:12A-5 and 40A:12A-6) for the purpose of granting tax exemptions within the enterprise zone district pursuant to the provisions of P.L.1991, c.431 (C.40A:20-1 et seq.) or the adoption of a tax abatement and exemption ordinance pursuant to the provisions of P.L.1991, c.441 (C.40A:21-1 et seq.). The municipality shall not utilize any other redevelopment powers within the urban enterprise zone unless the municipal governing body and planning board have also taken the actions and fulfilled the requirements prescribed in P.L.1992, c.79 (C.40A:12A-1 et al.) for determining that the area is in need of redevelopment or an area in need of rehabilitation and the municipal governing body has adopted a redevelopment plan ordinance including the area of the enterprise zone.

3. Determination

Findings

Due to the concentration of vacant property and the presence of deteriorated housing, the Parkside Study Area is in need of redevelopment. Conditions meeting the following three criteria from the Local Redevelopment and Housing Law were found:

- The discontinuance of the use of buildings previously used for commercial, manufacturing, or industrial purposes; the abandonment of such buildings; or the same being allowed to fall into so great a state of disrepair as to be untenable (e.g. blocks such as 364 - 367, 1300, 1267, and 1302).
- A growing lack or total lack of proper utilization of areas caused by the condition of the title, diverse ownership of the real property therein or other conditions, resulting in a stagnant or not fully productive condition of land potentially useful and valuable for contributing to and serving the public health, safety and welfare (e.g. blocks such as 1303-1314, 1349).

These conditions are detrimental to the general and residential welfare of those living in Parkside and the surrounding area. In addition, the Parkside Study Area is in the NJ Urban Enterprise Zone, satisfying another criterion (G) of the Local Redevelopment and Housing Law.

Conclusion

The findings of this investigation clearly indicate that the Parkside Study Area qualifies as an area in need of redevelopment. Criteria B, E and G of the NJSA 40A: 12A have been met. Specific stability and development problems identified in the Study Area and establishing grounds for this determination, include:

- Proliferation and concentration of vacant property
- Deteriorated occupied residential properties
- Concentrations of buildings in substandard or deteriorated condition

PARKSIDE DETERMINATION OF NEED STUDY

Establishing the Framework

These conditions show the serious decline in Parkside's housing and commercial occupancy and maintenance, which threaten the stability of the study area and surrounding neighborhood. This study recommends that the Camden City Planning Board and Municipal Council, after public notice and hearings, make a determination that the Parkside Study Area defined in this document is in need of redevelopment according to law, and subsequent to the approval of a redevelopment plan to address these needs, be declared a redevelopment Project Area.

Once declared a redevelopment area, a redevelopment plan can be prepared and enacted to help ensure proper restoration of property within the Parkside Redevelopment Area. It is expected that housing and businesses within and surrounding the study area will experience renewed improvements as a result of Parkside's designation, followed by the implementation of Parkside Redevelopment Plan. It is further anticipated that subsequent redevelopment activity will benefit surrounding neighborhoods of Whitman Park and Gateway, Central Camden, and be a model for the City as a whole. Some properties in the Parkside Study Area have a stabilizing influence and can significantly contribute to the area's redevelopment. This leveraging potential is in concert with New Jersey's redevelopment statute, which states that "...a redevelopment area may include lands, buildings, or improvements which of themselves are not detrimental to the public health, safety or welfare, but the inclusion of which is found necessary. With or without change in their condition, for the effective redevelopment of the area of which they are a part."
