

Addendum I

August 5, 2021

RE: CONTRACT AND BID SPECIFICATIONS FOR DOMINICK ANDUJAR PARK ENVIRONMENTAL REMEDIATION

Point and Erie Streets (Block 12, Lot 1), Camden, New Jersey

Clarifications:

1. The historic analytical data mentioned in the RFP and the boring logs have been uploaded to the attachments link: <https://spaces.hightail.com/space/qzNk8I02xR>, which may be accessed via the link provided or Request copies of the attachments on a CD for no charge; Printed copies of all of the attachments may be provided by request and a non-refundable fee payment of \$88.60. For more information regarding the attachments on CD or as printed copies, please contact: Susan Kolich, BRS, Inc., susan@brsinc.com, (856) 964-6456 (ext. 6852).
2. A request for the required seed mixture for restoration was submitted. As grass seeding during site restoration is only for soil stabilization purposes, no specific type of grass seed is mandated.
3. In the event that excavations are required in areas of existing fencing, bleachers, or other existing items, all efforts shall be made to minimize removal as much as possible and as directed by the CRA Representative. No existing as-builts are available for this site.
4. Contractor shall assume that the LSRP or the CRA Representative will be on site during the entire remediation.
5. Post-excavation sampling will not be required prior to backfill. Additional delineation sampling is being conducted at this time to shore up the extent of excavations. However, in the event that collection and analysis of post excavation samples is required prior to backfilling, this sampling will be done by others.
6. Contractor shall assume that perimeter security fencing will be required for active work areas to include excavations, soil staging areas and decontamination areas.

All other terms and conditions of the solicitation remain as is.
